

# 2026 Summer Program Policies

---

## Program Overview

The Pi Learning Academy Summer Program provides a dynamic and engaging learning experience for students in grades 1-6. Designed for both homeschoolers and students seeking an alternative to traditional summer camps, our program offers a mix of STEM activities, hands-on projects, and weekly field trips to enhance real-world learning.

As homeschooling parents, ourselves, we understand the importance of a flexible, personalized approach to education. With our licensed educators and small class sizes, we create an environment where every child can explore, learn, and thrive at their own pace. Additionally, students who are falling behind can use this time to catch up, strengthen foundational skills, and brush up on their curriculum to ensure they start the new school year with confidence.
